About: I was born and raised in Ukraine, Eastern Europe. In 2018 I won in the Diversity Visa Lottery and moved to the United States. I'm a curious and driven person, a lifelong learner who started coding and discovered a huge passion in front-end development. I invite you to take a look at my portfolio and GitHub page to see the examples of the many self-initiated projects and tutorials I took.

Education:

A.A. in Computer Science & Graphic Design
Los Angeles Pierce College, GPA: 3.78
2020 – 2023

Awards:

- 2X Dean's List
- Gelb Group Scholarship Recipient

Client-side: HTML - CSS - JavaScript - ReactJS - SASS - Bootstrap - jQuery

Sever-side: NodeJS - MongoDB - Express - Mongoose

Creative: Adobe Photoshop - Adobe Illustrator – Adobe XD

Projects:

Little India ([GitHub](#) – [Deployed](#)):

- Designed and developed the front-end for the non-existent Indian Restaurant's website using
- HTML, SASS and basic Javascript
-

Rory Gilmore Reading Challenge ([GitHub](#) - [Deployed](#)):

- Developed in React, using React Hooks, to manage, filter and categorize books by genres
- Used "vanilla" CSS for styling

Professional experience:

Customer Reviews Analyst, part-time

Harbor Freight Tools, Inc.,

Jan 2020 - present

- Run, create, and distribute daily reports to different teams within the organization.
- Keep track of all recommended moderation actions by the different teams.
- Flag and distribute any inappropriate or safety-related product reviews to specified teams.
- Read through all escalated product reviews and moderate based on current guidelines.
- Keep track of all suggested merchant responses by all teams and post the responses when appropriate.
- Run and distribute ad hoc report requests by other teams as needed.
